Proform v1.92 build.3 Release Notes (includes build 2)

Summary of New Features in v1.92 build 3

- Going Adjustments added in many places including filters.
- Foaling Months in System Builder.
- JSH Betting Exchange Prices. Historical and live prices from JSH added everywhere.
- Importers Screen added.
- Exporter. Fields Added.
- Horse Perf Screen. More fields added.
- Calendar Screen upgraded.
- Today's Runners, new fields added.
- Auto Non-Runners upgraded.
- Welcome Screen upgraded.
- Bangor going changes bug fixed.
- Exporter, new fields added
- How the race worked out fixed.

Proform v1.92 build.3 Release Notes (includes build 2)

1.92 Build 2

Build 2 features are including in build 3. The main build 2 feature was replay links, which you can read about below.

Replay Links

You can jump to replays on ATR and RTV website from around December 2010 onwards

You can do this from a race results screen by clicking the replay icon

Proform v1.92 build.3 Release Notes (includes build 2)

Going Adjustments

We have always created going adjustments (GA) internally, which we use to create the Proform Speed Figures, however we have never released them, until now.

GA's show you how much the ground on the day was speeding up or slowing down horses in seconds per mile.

A going adjustment of 0 would represent perfect Good ground in races on turf or perfect Standard ground on the all-weather surface. We then have positive or negative GA's to varying degrees.

GA Lookup Table

JUMPS and FLAT TURF

Going Adjustment	Actual Going Description
-15.0 or worse	Extremely Bottomless
-12.0 to -14.99	Bottomless
-9.5 to -11.99	Extremely Heavy
-8.0 to -9.49	Very Heavy
-6.5 to -7.99	Heavy
-5.0 to -6.49	Very Soft
-3.5 to -4.99	Soft
-1.0 to -3.49	Good to Soft
-0.99 to +2.00	Good
+2.01 to +2.99	Good to Firm
+3.0 or higher	Firm

ALL WEATHER

Going Adjustment	Actual Going Description
<0 then	Slow
0 to 2.99	Standard
3.0+	Fast

GA's are very useful particular when the ground is extremely slow. You can see in the table we have the standard going descriptions ranging from Firm to Heavy and Fast to Slow but particularly in races on grass we have four more going descriptions for when the ground is very bad.

There are some horses, sires, dams and damsires that only show their best when performing in demanding conditions and GA's in Proform will allow you to find these horses on days when the ground is truly terrible.

Proform v1.92 build.3 Release Notes (includes build 2)

So, what have we added to the Proform Software regarding GA's?

System Builder

There is a new GA field in the system builder in the race tab.

Race Filter

3m 5f = 6380 yards
4m = 7040 yards
4m 2f = 7480 yards
4m 4f = 7920 yards

This means you can create any number of filters to quickly filter form in the form book using GA's.

To refresh yourself on how filters work visit this [help link](#).

We have also changed the distance filters to yards on the same screen. This is because the old method contains a bug when new distances were introduced which meant filters kept breaking.

By using yards instead this fixes that issue.

NOTE: Any existing filters you have setup will need to be opened and re-saved for them to work.

Proform v1.92 build.3 Release Notes (includes build 2)

Foaling Months

We have added a foaling months list to the system builder on the horse tab.

FOALING DATES

Restrict by months

<input checked="" type="checkbox"/>	January
<input checked="" type="checkbox"/>	February
<input checked="" type="checkbox"/>	March
<input checked="" type="checkbox"/>	April
<input checked="" type="checkbox"/>	May
<input checked="" type="checkbox"/>	June
<input checked="" type="checkbox"/>	July
<input checked="" type="checkbox"/>	August
<input checked="" type="checkbox"/>	September
<input checked="" type="checkbox"/>	October
<input checked="" type="checkbox"/>	November
<input checked="" type="checkbox"/>	December

Flip Foaling Months

You can use these to restrict systems to searches to 1 or many foaling months.

The flip button will flip the months ticked to unticked and vice-versa.

NOTE: We have more to add in this area, presentations by foaling month and exporter and drill down variable to name three. They will be added in the future versions.

NOTE: Foaling dates are just about complete from 2002 onwards.

Proform v1.92 build.3 Release Notes (includes build 2)

JSH Betting Exchange Prices

What are JSH Prices?

They are historical and live prices from betting exchanges at key times throughout the day.

They are available as an external subscription via the website JustStartHere.com

We have no affiliate link with their website we are just a public subscriber.

You can subscribe for just £6 per month for live prices and you can purchase historical prices at various rates but overall, very cheaply. You can get all back data from 2011 to now for £150!

How can they be used in Proform?

We have written an importer that will allow you to import JSH Prices from the historical and live files (once you purchase them).

It is then possible to query the historic and live prices in the system builder and view live prices in the racecard in dataview and many other places.

Once imported you can also export them from the exporter or the system builder.

JSH also create ratings and percentage price movements. The imports into Proform will rank these so they can be queried in the system builder.

How do I get the JSH live data?

Their main page, [HERE](#), contains a register link at the bottom to start a monthly subscription.

How do I get the historical data?

There is a link from their main page but [HERE](#) is a direct link to their historical data subscription page.

How do I get the data into Proform?

Once you have subscribed to JSH you can download a daily csv file and then use the Proform JSH Importer to import the data.

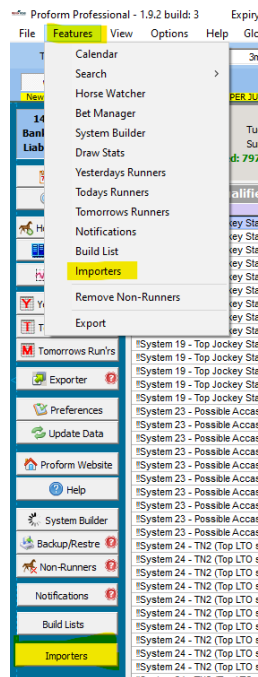

Similarly, once you subscribe to historical data, they will send you all the data you purchase in a zip file. You then extract this and use Proform JSH Importer to import the data.

Proform v1.92 build.3 Release Notes (includes build 2)

Importing JSH Data Files

Once you have the historical or daily live data files from JSH you can then importer them using the Proform JSH Importer.

This can be found from the Importers buttons down the left of the Proform main screen or from the features menu at the top of Proform

Once you open the Importers screen the JSH importer is in the first tab and looks like this.

A screenshot of the 'JSH Price Importer' tab within the Proform JSH Importer application. The interface has a green background. At the top, there are several tabs: 'JSH Price Importer' (active), 'Notes Importer', 'Notes Exporter', 'Power Ratings Importer', 'User Rating 1 Importer', 'User Rating 2 Importer', and 'User Rating 3 Importer'. Below the tabs, there is a text input field for 'Base Folder Name' with the value 'C:\Racing\JSHData\JSHAllData\'. Below this is a detailed instruction in purple text: 'Enter the full path name where you extracted the JSH files. This folder should contain a folder for each year and month formatted like this JSH<mmm><yyyy> i.e. JSHJul2021. In each month/year folder should be the daily csv files formatted like this yyyyymmdd.csv i.e. 20210731.csv. This folder and file layout is the default extraction layout from the files JSH provide.' Below the instruction are four input fields: 'Start Year' (2022), 'End Year' (2022), 'Start Month' (01), and 'End Month' (12). Below these is another purple instruction: 'Enter the years and months to import. You can set the start and end for both, which allows you to import 1 month, a full year or everything!'. To the right of this instruction is a large button labeled 'START FULL IMPORT'. Below the instruction is a 'Single File Import' button and a note: 'You use this button to import just one file at a time.' At the bottom left, there is a 'Progress' section with two zeros. Below this is a large empty rectangular area for a log or progress display.

Proform v1.92 build.3 Release Notes (includes build 2)

Instructions for importing JSH historical data files

If you purchase historical data you should receive a zip file by email.

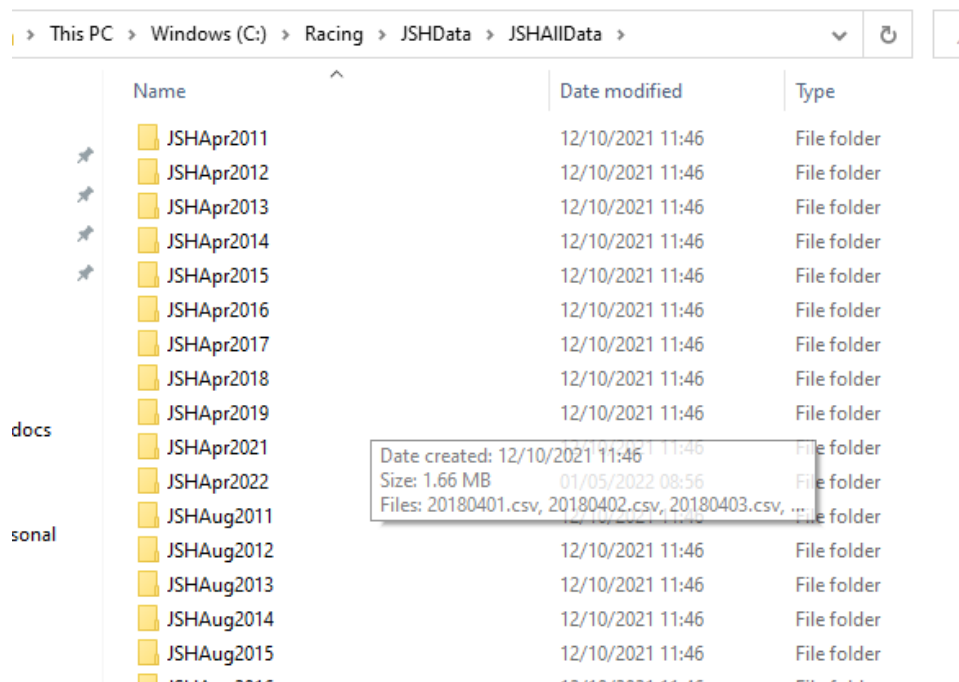

- Our suggestion is to create a folder on your C: drive called C:\Racing\JSHData
- Use windows explorer to go to drive C: and create a folder called Racing
- Then from within the Racing folder create another folder called JSHData
- Save the zip file to this new folder, C:\Racing\JSHData
- Right click the zip file and choose Extract All and then click the Extract Button

This will extract everything to the folder

C:\Racing\JSHData\JSHAllData\

- Use windows explorer to look in the folder C:\Racing\JSHData\JSHAllData\ and if you have purchased multiple historical files from JSH then there will be further zip files for each month
- Right click each zip file one at a time and choose Extract All and then click the Extract button.
- This will then create a folder for that month and extract all the files into the month folder

Do this with each historical file so that you end up with a list of folders for each month with the data files in them, like this

You can then use the Proform JSH importer to import all the historical data you purchased.

Proform v1.92 build.3 Release Notes (includes build 2)

If you used our suggested folder layout, then the importer will be all setup pointing to the right place. If not then you can change the folder in the Base Folder Name box, but you will need to change each time you open Proform to wherever you extracted the files to.

Now you will just need to choose the years and months to import and then click on the START FULL IMPORT button.

Progress will be shown in the progress box.

Be warned! If you import large amounts of data, it will take some time!

Thankfully you only need import the historical data once.

Proform v1.92 build.3 Release Notes (includes build 2)

Importing daily live JSH data files

If you also subscribed to the £6 per month for daily files, then you will need to be LOGGED IN to the JSH Website and on the follow page [JustStartHere](#), which you navigate to via downloads/reports/original (csv)

Once on this page click on the link which says

[Click here to access historic CSV files](#)

You will see a list of files like this

All new files you are allowed access to will be on this page and the most recent one will be today's live file.

Click each file to download them and save them to the folder for this month.

If you used the folder structure, we suggested then that first file 20221114.csv you would save to the folder

C:\Racing\JSHData\JSHAllData\JSHNov2022

Once saved you can use the Proform JSH importer to import this file by choosing the Single File Import option and then navigating to the correct folder and choosing the saved file.

Proform v1.92 build.3 Release Notes (includes build 2)

Live Prices File

The file for today's racing on JSH website will be updated continually all day on their website when prices are logged and when they create their ratings etc

If you create systems around percentage movements or ranks of price movements or JSH ratings, then you will need to keep downloading and importing the daily file to update in Proform.

We also suggest that the next day you also download the previous days file and import again if you have not updated throughout the day so that you keep on top of importing historical data. You could of course just do this every few days or at the end of a month if required.

Proform v1.92 build.3 Release Notes (includes build 2)

Understanding the data

On the JSH website there is a user guide which can be found [HERE](#).

NOTE: JSH show the percentage divided by 10
Example if they show 5.68 then this is 56.80% steam in price or -0.45 would be -4.5% drift.
A positive percentage is a steam in price and negative is a drift in price.

Proform v1.92 build.3 Release Notes (includes build 2)

JSH Prices in the System Builder

There is a new tab in the system builder called JSH – Ratings & Prices.

The screenshot shows the 'JSH Prices' tab selected in the system builder. The interface has a top menu bar with various options: Date, Race, Course, Classifications, Horse, Breeding, Horse 2, Price Movements, In Running, Presentation, Presentations (Ratings), <--- SYSTEM RESULTS --->, Filter Results, and Preferences. Below the menu bar, there are several sub-tabs: Ratings (Speed & User), JSH - Ratings & Prices (highlighted), LTO Race, LTO Course, LTO Classifications, and LTO. The main content area is titled 'JSH Prices' and is divided into two columns: 'JSH Fields by Rank' and 'JSH Fields by Value'. Each column contains a list of fields with corresponding input boxes. The fields are: CPR Ratings, Star Ratings, Newspaper Tips Ratings, Newspaper Naps Ratings, 9am to 11am Move Perc, 11am to 60min Move Perc, 11am to 30min Move Perc, 11am to 15min Move Perc, 11am to 5min Move Perc, 11am to 3min Move Perc, 11am to 2min Move Perc, 11am to 1min Move Perc, 3min to 1min Move Perc (321), and Mean Move Perc. A red note at the bottom right states: 'NOTE: JSH show percentages divided by 10 Example 20% would be 2.0'.

NOTE: JSH show percentages divided by 10
Example 20% would be 2.0

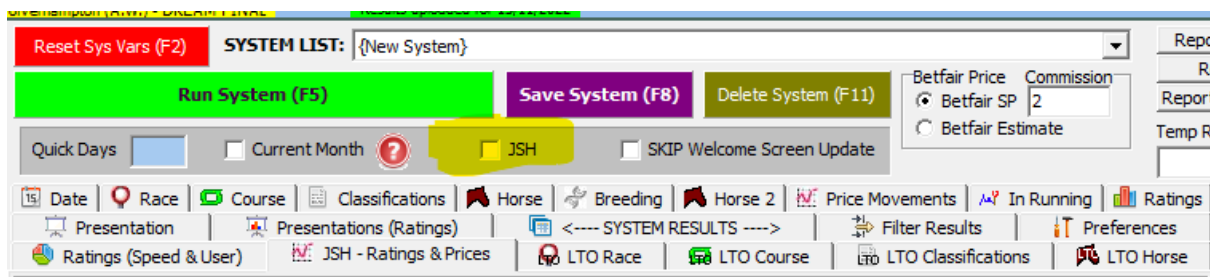

In this tab you can query

- The ranks of the JSH Ratings
- The ranks of the percentage movements
- The values of the percentage movements

Proform v1.92 build.3 Release Notes (includes build 2)

Check the JSH Tick Box to run System Builder Queries

There is a JSH tick box in the system builder on the heading area

If you want to output the P/L to the various JSH price points, then you need to check this box first.

If you use any field on the JSH Tab in System Builder, then the box will get auto checked when you run a System Query.

Here is the output to a query with the JSH tick box checked which will be at the end of the system builder returns area

	9am PL	10am PL	11am PL	60m PL	30m PL	15m PL	5m PL	3m PL	2m PL	1m PL

4m 4f	=	7920 yards

Ok Cancel

This means you can create any number of filters to quickly filter form in the form book using GA's.

To refresh yourself on how filters work visit this [help link](#).

We have also changed the distance filters to yards on the same screen. This is because the old method contains a bug when new distances were introduced which meant filters kept breaking.

By using yards instead this fixes that issue.

NOTE: Any existing filters you have setup will need to be opened and re-saved for them to work.

Proform v1.92 build.3 Release Notes (includes build 2)

Today's Runners Screen

Added new fields for classnum, date and time split out, distance in yards and jockey claim to both quick and slow today's runners screen.

Auto Non-Runners

If non-runner tool is running in auto mode, then it will check that it is on today's date before processing the non-runners.

This will mean that if Proform is left running 24/7 then the first check after midnight will roll the auto non-runner tools date forward to the new day.

Welcome Screen

Made horse watcher on welcome screen sizeable and added a new field so you can order by day, course, time, and you can now right click to see notes.

Base Folder Name

C:\Racing\JSHData\JSHAllData\

Enter the full path name where you extracted the JSH files. This folder should contain a folder for each year and month formatted like this JSH<mm><yyyy> i.e. JSHJul2021. In each month/year folder should be the daily csv files formatted like this yyyyymmdd.csv i.e. 20210731.csv. This folder and file layout is the default extraction layout from the files JSH provide.

Start Year 2022 End Year 2022 Start Month 01 End Month 12

Enter the years and months to import. You can set the start and end for both, which allows you to import 1 month, a full year or everything!

START FULL IMPORT

Single File Import You use this button to import just one file at a time.

Progress 0 0

NOTE: We have currently only added the JSH Price Importer, but tabs are ready for the rest to be added in future releases.
