1.92 Build 4 Release Notes

Summary of New Features in v1.92 build 4

- Added in past race times tab to data view so a going predictions can be made after a race is run.
- Exporter: Added ability to save 5 sets of ticks, and calculated box is now saved too. Added option to export just UK courses or just IRE courses. Added a block in if more than 85 calculated fields are selected in the exporter and also added ability to select 1st, 2nd or 3rd 85 calculated fields.
- EP profit/loss in system builder will automatically use BOG prices off for races on and after 27th March 2023 when Bet365 stopped offering best odds guaranteed the night before.
- Class changes in system builder. Added drop and rise in class to race tab in system builder.
- Added GA to exporter.
- Added presentation for Owner / Jockey (does not save).
- Added presentation for Owner / Trainer (does not save).
- Added foal date Month presentation (does not save).
- Added GA to in running tab in form book.
- Add a flip courses button to Course and LTO Course tab in system builder.
- Added 7 day trainer PRB to quick yesterday, today's, tomorrow's runners screen.
- Added 7,14,28,56 day trainer PRB to SLOW yesterday, today's, tomorrow's runners screen.
- New tickbox in prefs to access SUPER SLOW yesterday, today's, tomorrow's runners screen.
- Added lots of trainer PRB data to SUPER SLOW yesterday, today's, tomorrow's runners screen.
- Fixed sire stats in data view as build.3 caused them to stop working.
- Adjusted colour of GA help in system builder and moved and made bigger. Also moved GA field to be above help.
- Fixed a BUG on new non-runner auto roll date forward feature.
- Fixed a BUG on Betfair Place returns on 4th placed horses at a handful of Irish courses.
- Fixed a BUG in main filters, all filters will need to be setup again and re-saved or deleted and started again.
- Fixed a BUG in classification tab in system builder where boxes were sizing weirdly.
- Fixed a BUG in pattern matcher on number of runners display.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Added in past race times tab to data view so a going prediction can be made after a race is run.

When you are viewing a race in the Proform Form Book there is a new tab called Past Race Times.

This screen will be predominantly used to help you pre-determine what the actual going is at a meeting by comparing the time a race was won in, against past times for the course and distance you are viewing.

Let's first explain the on-screen features.

Turning On

When you first open it tick the Turn On Turn ON tick box for data to be displayed and it will look like this.

Date_Time	Winner	Time_In_Seconds	Official_Going	Actual_Going	Class	Race_Distance	GA	Time_In_Minutes
28/12/2022	Rafferty's Return	332.06	Good To Soft	Good To Soft	3	2m 5f 56y	-1.25	5m 32.06s

Filters

Number of race times to view

You can add more past races by changing the value in the Number of time records to retrieve box,

Number of Time Records to Retrieve

default is 50.

Expanding distances to view more races

If there are not many past races times you can expand 1 yard at a time using the Expand Distances -

Expand Distances - +

/ + box

This is useful particularly in Ireland where they tend to re-measure the distance of each race after they have setup the course for the day.

An example would be the following race at Wexford, which has just 8 past races at the distance.

Tomcoole Farm Ltd Mares Maiden Hurdle (Class E) (iD:281290) Distance: 2m 4f 150y Class: 4 Going: Heavy

Turn ON Time in Seconds Adjusted Time **0.00s** Number of Time Records to Retrieve Expand Distances - + Class

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Filtering out by race class

A screenshot of a blue-themed interface showing race class filters. It features a 'Class' label followed by a text input field containing the number '1'. To the right of this is a 'From' label followed by another text input field containing the number '7'. Below these is a 'To' label.

You can use the race class filters to knock out some of the queried race times. This is helpful to remove any super quick times recorded in high class races when trying to assess the ground in a lesser class race, and vice-versa.

Filter by ground

You can filter out race times on one or more official goings using the going tick boxes.

A screenshot of a blue-themed interface showing ground filters. On the left is a 'Going' label. To its right is a list of nine ground types, each with a checked checkbox: Heavy, Slow, Soft, Good To Soft, Standard, Good, Good To Firm, Fast, Firm, and Hard. A 'Filters' label is visible at the bottom left of the control area.

Applying Filters

If you choose any of the four filters then just click on the Apply Filters button  for the race's times to re-display.

Resetting Filters

Just click on the reset Filter button. 

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

How to use

Entering a race time

When race is run you can find the winning time on various racing websites, such as sporting life or racing post and you will also see fast and full results on the Proform website when we launch our updated website later this year.

You can also see unofficial winnign race times if watching ATR or RTV.

Once you know the winning time which is usual displayed something like this, 5m 39.60s, you can

Time in 5 m 39 s 60 ms

then enter this into the time in box

The time in seconds will be auto filled and the adjusted time show you the time in seconds to use when comparing against the list of past race times at the course and distance.

Time in Seconds 339.60 Adjusted Time 339.60
Time in 5 m 39 s 60 ms

You can then use this time to compare against past race times at this course and distance to see where it fits in and thus give you an idea of the actual ground and going adjustment it could be today. *(Note: I had ordered this list of past race times by time in seconds descending in this example)*

You can see above where the winning time of the race in question, 339.60, fits in relation to past times.

(Warning Note: Use this feature as a guide to the ground conditions, not gospel!)

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Added option to export just UK courses or just IRE courses.

On the export screen there are two new tick boxes so you can export just UK or IRE courses

Course ALL COURSES

Tick for just UK Courses

Tick for just IRE Courses

Added a block in if more than 85 calculated fields are selected in the exporter and added ability to select 1st, 2nd or 3rd 85 calculated fields.

If you tick more than 85 calculated fields, then the export will not run when you click the export button because in most cases your computer will run out of memory or resources so we have added a restriction of 85 calculated fields.

We have also added three buttons so you can tick the first, second or third 85 fields in the calculated fields list.

Tick Selections

Select FIRST 85 calculated fields

Select SECOND 85 calculated fields

Select THIRD 85 calculated fields

Exporter: Added ability to save 5 sets of ticks, and calculated box is now saved too.

Previously in Proform the exporter only remembered one set of ticks, you can now store five sets of ticks.

Just choose one of the five export ticks from the list on the right and it will load the ticks you saved.

If you have not chosen any yet, then all fields will be unticked.

Once you start ticking fields to export, they will automatically save against the Export number you have chosen.

Saved Export Ticks

EXPORT 1

EXPORT 2

EXPORT 3

EXPORT 4

EXPORT 5

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

EP profit/loss in system builder will automatically use BOG off for Evening Prices.

Bet365 stopped offering Best Odds Guaranteed on evening prices from Monday 27th March 2023.

We have altered the system builder to reflect this.

The EP returns in system will now include BOG prior to 27/03/2023 and will NOT use BOG from thereafter.

This means you can still run a query over any period, and it will work out the correct price to use from the date the race was run.

You can still however turn off BOG on the date tab if you wanted to see all EP no BOG.

Class changes in system builder. Added drop and rise in class to race tab in system builder.

On the race tab there is two new fields, drop-in class and rise in class.

The image shows a screenshot of a system builder interface. It contains two input fields, each with a blue border and a blue background. The first field is labeled "Dropping in Class by" and has the text "or more" to its right. The second field is labeled "Rising in Class by" and also has the text "or more" to its right. The fields are positioned one above the other.

You can use these to find angles on horses dropping or rising in class.

If for example you enter 2 in the dropping in class box, then your system returns would only look at horses who were dropping in class by 2 or more race class numbers.

The query will look at the last race regardless of race type.

If you enter a number in both boxes, you will get no results as a horses cannot drop and rise in class.

Added GA to exporter.

Going adjustment is now in the export at the bottom of column two.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Added presentation for Owner / Jockey (does not save).

There is a new presentation for owner / jockey in the presentation tab of the system builder at the bottom of the 2nd column of breakdown by horse variables.

It does not save with the system as no real need to save presentations.

Added presentation for Owner / Trainer (does not save).

There is a new presentation for owner / trainer in the presentation tab of the system builder at the bottom of the 2nd column of breakdown by horse variables.

It does not save with the system as no real need to save presentations.

Added foal date Month presentation (does not save).

There is a new presentation for foaling month in the presentation tab of the system builder at the bottom of the 1st column of breakdown by horse variables.

It does not save with the system as no real need to save presentations.

Added GA to in running tab in form book.

Going adjustment added to the in running tab in the form book. It will initial at the very right end of the fields.

Add a flip courses button to Course and LTO Course tab in system builder.

This will flip the ticked course in the list with the unticked course.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Added 7 day trainer PRB to quick yesterday, today's, tomorrow's runners screen.

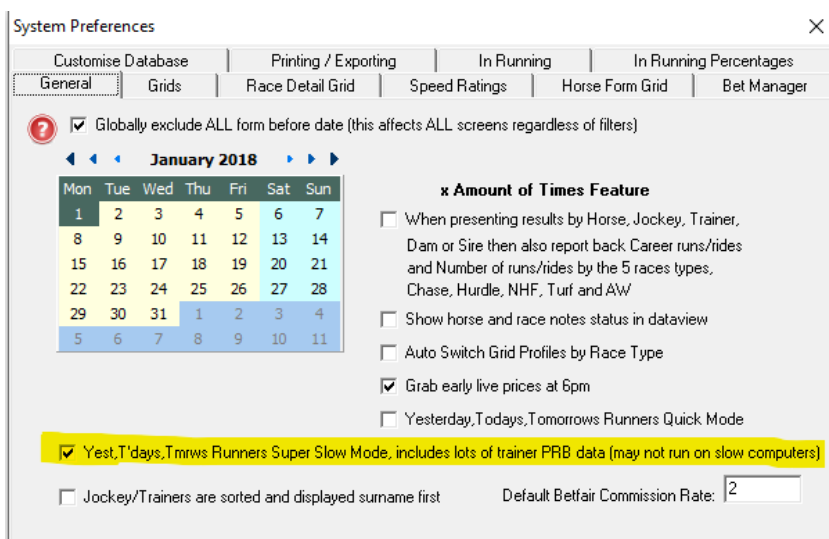

Self-explanatory.

Added 7,14,28,56 day trainer PRB to SLOW yesterday, today's, tomorrow's runners screen.

Self-explanatory.

New tick box in preferences to access SUPER SLOW yesterday, today's, tomorrow's runners screen.

There is a new tick box in the preferences screen for a new super slow today's runners screen.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Added lots of trainers PRB data to SUPER SLOW yesterday, today's, tomorrow's runners screen.

New fields added are all for trainer's records at various time points and also comparisons of those records against the last 2-year record as a benchmark.

t7PRB	Last 7 days trainer PRB record
t14PRB	Last 14 days trainer PRB record
t28PRB	Last 28 days trainer PRB record
t56PRB	Last 56 days trainer PRB record
t7PRB^2	Last 7 days trainer PRB^2 record
t14PRB^2	Last 14 days trainer PRB^2 record
t28PRB^2	Last 28 days trainer PRB^2 record
t56PRB^2	Last 56 days trainer PRB^2 record
t5PRB^2	Last 5 days trainer PRB^2 record
t10PRB^2	Last 10 days trainer PRB^2 record
t15PRB^2	Last 15 days trainer PRB^2 record
t20PRB^2	Last 20 days trainer PRB^2 record
t25PRB^2	Last 25 days trainer PRB^2 record
t30PRB^2	Last 30 days trainer PRB^2 record
t60PRB^2	Last 60 days trainer PRB^2 record
t1yearPRB^2	Last 1 year trainer PRB^2 record
t2yearPRB^2	Last 2-year trainer PRB^2 record
t3yearPRB^2	Last 3-year trainer PRB^2 record
t4yearPRB^2	Last 4-year trainer PRB^2 record
t5yearPRB^2	Last 5-year trainer PRB^2 record
t5d-2y-P^2-Diff	Comparison of 5-day PRB^2 record against 2-year PRB^2 record
t10d-2y-P^2-Diff	Comparison of 10-day PRB^2 record against 2-year PRB^2 record
t15d-2y-P^2-Diff	Comparison of 15-day PRB^2 record against 2-year PRB^2 record
t20d-2y-P^2-Diff	Comparison of 20-day PRB^2 record against 2-year PRB^2 record
t25d-2y-P^2-Diff	Comparison of 25-day PRB^2 record against 2-year PRB^2 record
t30d-2y-P^2-Diff	Comparison of 30-day PRB^2 record against 2-year PRB^2 record
t60d-2y-P^2-Diff	Comparison of 60-day PRB^2 record against 2-year PRB^2 record

(Note: This takes 5 times longer than the current slow today's runners screen and may not run on slow, old, or low memory computers)

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Fixed sire stats in data view as build.3 caused them to stop working.

Self-explanatory.

Adjusted colour of GA help in system builder and moved and made bigger. Also moved GA field to be above help.

Self-explanatory.

Fixed a BUG on new non-runner auto roll date forward feature.

Self-explanatory.

Fixed a BUG on Betfair Place returns on 4th placed horses at a handful of Irish courses.

Self-explanatory.

Fixed a BUG in main filters, all filters will need to be setup again and re-saved or deleted and started again.

Self-explanatory.

Fixed a BUG in classification tab in system builder where boxes were sizing weirdly.

Self-explanatory.

Fixed a BUG in pattern matcher on number of runners display.

Self-explanatory.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

1.92 Build 3 Release Notes

Summary of New Features in v1.92 build 3

- Going Adjustments added in many places including filters.
- Foaling Months in System Builder.
- JSH Betting Exchange Prices. Historical and live prices from JSH added everywhere.
- Importers Screen added.
- Exporter. Fields Added.
- Horse Perf Screen. More fields added.
- Calendar Screen upgraded.
- Today's Runners, new fields added.
- Auto Non-Runners upgraded.
- Welcome Screen upgraded.
- Bangor going changes bug fixed.
- Exporter, new fields added
- How the race worked out fixed.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Going Adjustments

We have always created going adjustments (GA) internally, which we use to create the Proform Speed Figures, however we have never released them, until now.

GA's show you how much the ground on the day was speeding up or slowing down horses in seconds per mile.

A going adjustment of 0 would represent perfect Good ground in races on turf or perfect Standard ground on the all-weather surface. We then have positive or negative GA's to varying degrees.

GA Lookup Table

JUMPS and FLAT TURF

Going Adjustment	Actual Going Description
-15.0 or worse	Extremely Bottomless
-12.0 to -14.99	Bottomless
-9.5 to -11.99	Extremely Heavy
-8.0 to -9.49	Very Heavy
-6.5 to -7.99	Heavy
-5.0 to -6.49	Very Soft
-3.5 to -4.99	Soft
-1.0 to -3.49	Good to Soft
-0.99 to +2.00	Good
+2.01 to +2.99	Good to Firm
+3.0 or higher	Firm

ALL WEATHER

Going Adjustment	Actual Going Description
<0 then	Slow
0 to 2.99	Standard
3.0+	Fast

GA's are very useful particularly when the ground is extremely slow. You can see in the table we have the standard going descriptions ranging from Firm to Heavy and Fast to Slow but particularly in races on grass we have four more going descriptions for when the ground is very bad.

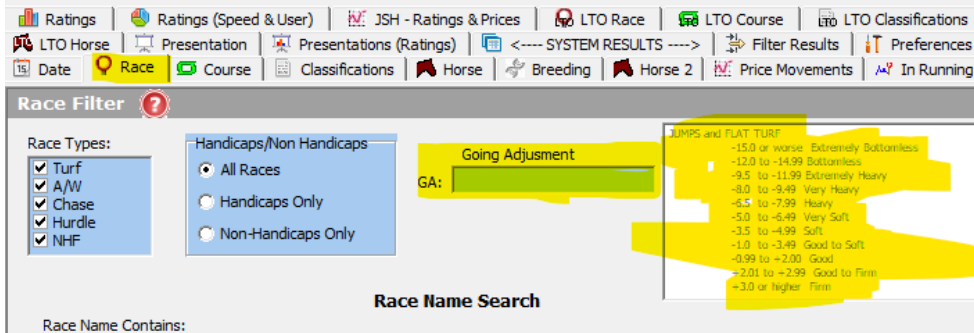

There are some horses, sires, dams and damsires that only show their best when performing in demanding conditions and GA's in Proform will allow you to find these horses on days when the ground is truly terrible.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

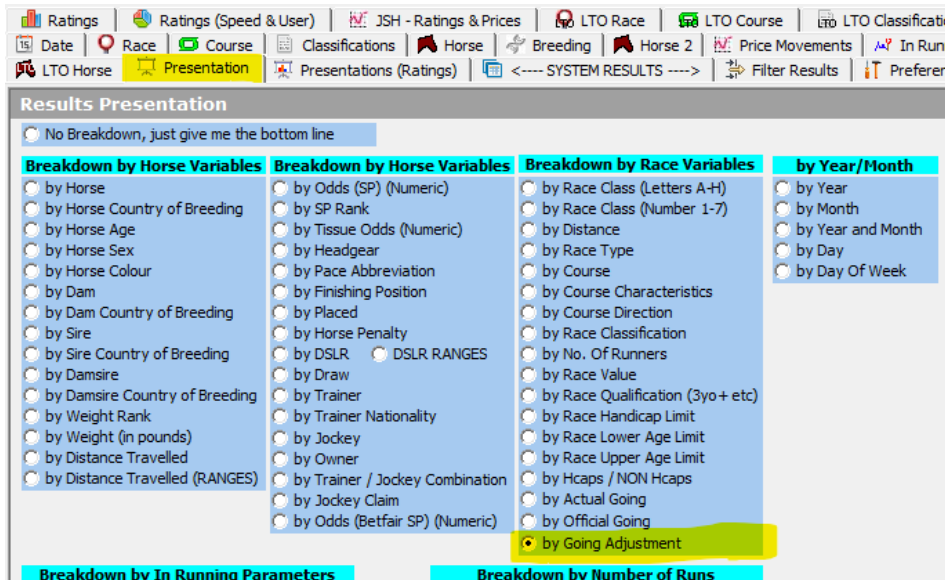

So, what have we added to the Proform Software regarding GA's?

System Builder

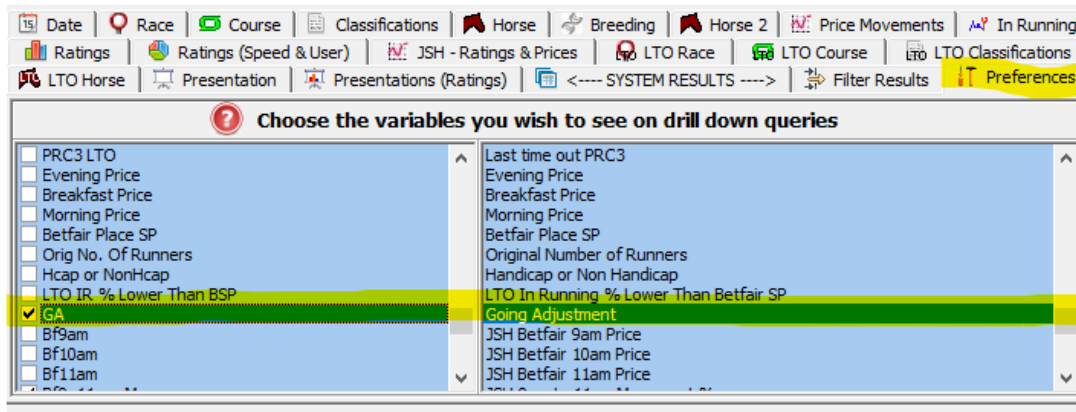

There is a new GA field in the system builder in the race tab.

You can present by GA in the presentation screen in the system builder

You can add GA to system builder drill downs in the system builder preferences tab, which means you use this for exporting GA's.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Form Book

When viewing a result in the form book dataview the actual going and GA are show in the header

This means you can create any number of filters to quickly filter form in the form book using GA's.

To refresh yourself on how filters work visit this [help link](#).

We have also changed the distance filters to yards on the same screen. This is because the old method contains a bug when new distances were introduced which meant filters kept breaking.

By using yards instead this fixes that issue.

NOTE: Any existing filters you have setup will need to be opened and re-saved for them to work.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Foaling Months

We have added a foaling months list to the system builder on the horse tab.

The screenshot shows a window titled "FOALING DATES" with a sub-header "Restrict by months". Below this is a list of twelve months, each with a checked checkbox: January, February, March, April, May, June, July, August, September, October, November, and December. At the bottom of the list is a button labeled "Flip Foaling Months".

You can use these to restrict systems to searches to 1 or many foaling months.

The flip button will flip the months ticked to unticked and vice-versa.

NOTE: We have more to add in this area, presentations by foaling month and exporter and drill down variable to name three. They will be added in the future versions.

NOTE: Foaling dates are just about complete from 2002 onwards.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

JSH Betting Exchange Prices

What are JSH Prices?

They are historical and live prices from betting exchanges at key times throughout the day.

They are available as an external subscription via the website JustStartHere.com

We have no affiliate link with their website we are just a public subscriber.

You can subscribe for just £6 per month for live prices and you can purchase historical prices at various rates but overall, very cheaply. You can get all back data from 2011 to now for £150!

How can they be used in Proform?

We have written an importer that will allow you to import JSH Prices from the historical and live files (once you purchase them).

It is then possible to query the historic and live prices in the system builder and view live prices in the racecard in dataview and many other places.

Once imported you can also export them from the exporter or the system builder.

JSH also create ratings and percentage price movements. The imports into Proform will rank these so they can be queried in the system builder.

How do I get the JSH live data?

Their main page, [HERE](#), contains a register link at the bottom to start a monthly subscription.

How do I get the historical data?

There is a link from their main page but [HERE](#) is a direct link to their historical data subscription page.

How do I get the data into Proform?

Once you have subscribed to JSH you can download a daily csv file and then use the Proform JSH Importer to import the data.

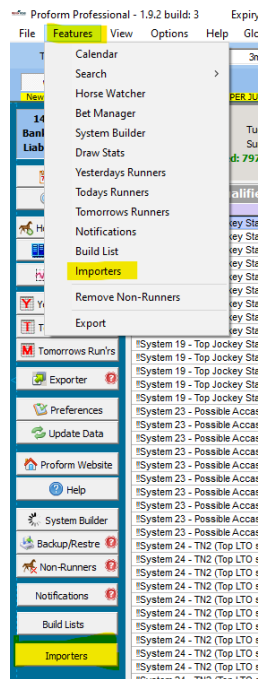

Similarly, once you subscribe to historical data, they will send you all the data you purchase in a zip file. You then extract this and use Proform JSH Importer to import the data.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

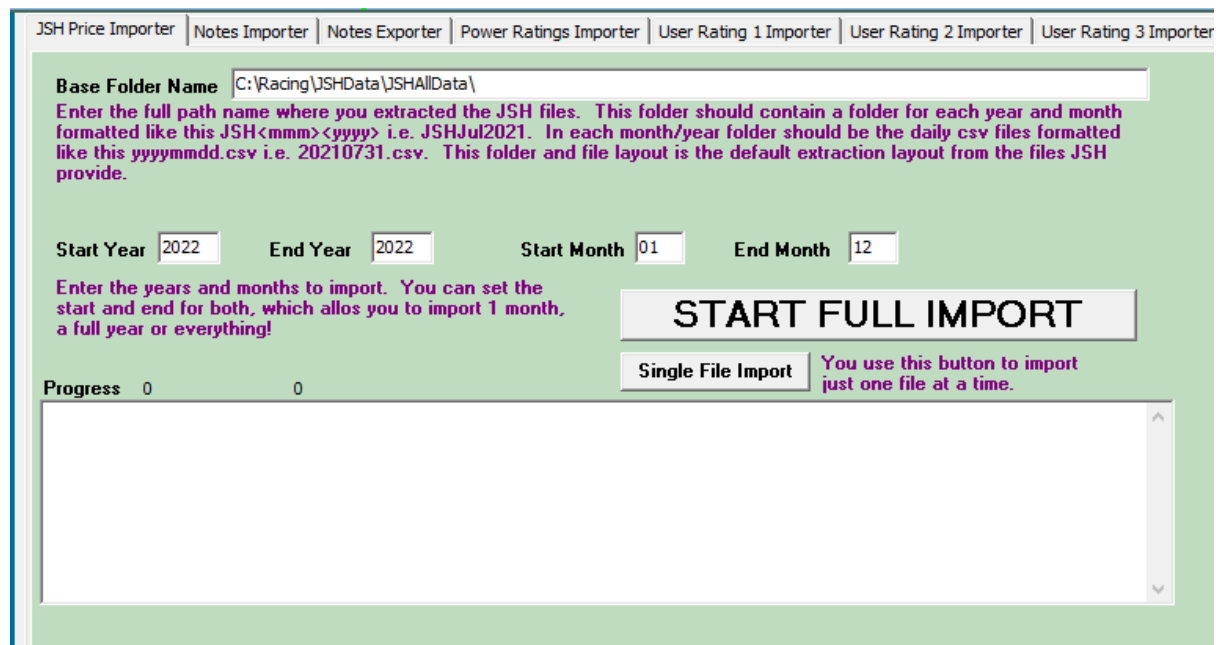

Importing JSH Data Files

Once you have the historical or daily live data files from JSH you can then importer them using the Proform JSH Importer.

This can be found from the Importers buttons down the left of the Proform main screen or from the features menu at the top of Proform

Once you open the Importers screen the JSH importer is in the first tab and looks like this.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Instructions for importing JSH historical data files

If you purchase historical data you should receive a zip file by email.

- Our suggestion is to create a folder on your C: drive called C:\Racing\JSHData
- Use windows explorer to go to drive C: and create a folder called Racing
- Then from within the Racing folder create another folder called JSHData

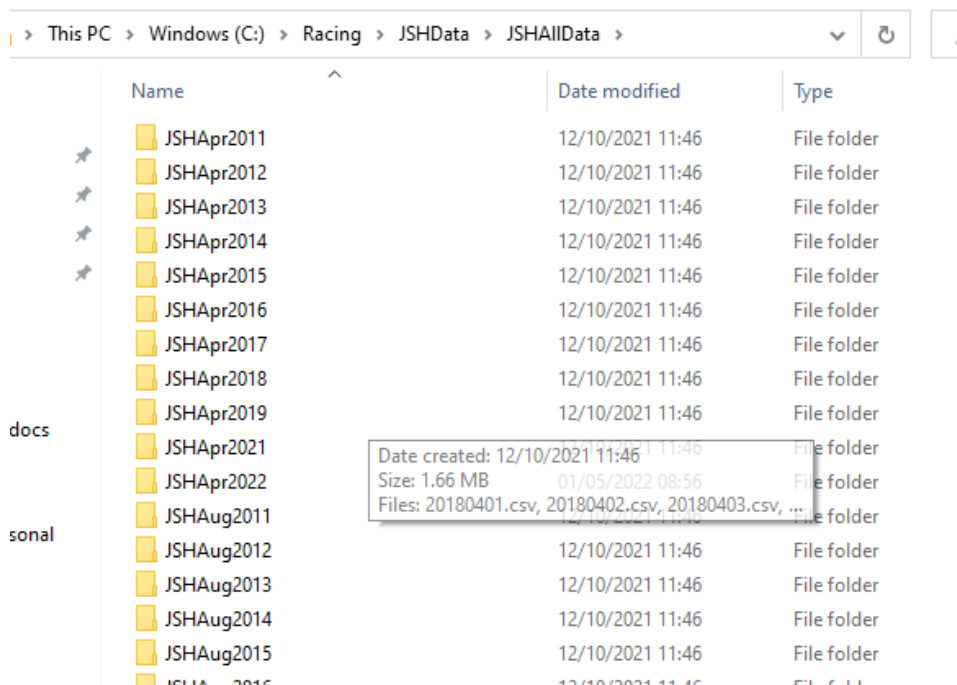

- Save the zip file to this new folder, C:\Racing\JSHData
- Right click the zip file and choose Extract All and then click the Extract Button

This will extract everything to the folder

C:\Racing\JSHData\JSHAllData\

- Use windows explorer to look in the folder C:\Racing\JSHData\JSHAllData\ and if you have purchased multiple historical files from JSH then there will be further zip files for each month
- Right click each zip file one at a time and choose Extract All and then click the Extract button.
- This will then create a folder for that month and extract all the files into the month folder

Do this with each historical file so that you end up with a list of folders for each month with the data files in them, like this

You can then use the Proform JSH importer to import all the historical data you purchased.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

If you used our suggested folder layout, then the importer will be all setup pointing to the right place. If not then you can change the folder in the Base Folder Name box, but you will need to change each time you open Proform to wherever you extracted the files to.

Now you will just need to choose the years and months to import and then click on the START FULL IMPORT button.

Progress will be shown in the progress box.

Be warned! If you import large amounts of data, it will take some time!

Thankfully you only need import the historical data once.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Live Prices File

The file for today's racing on JSH website will be updated continually all day on their website when prices are logged and when they create their ratings etc

If you create systems around percentage movements or ranks of price movements or JSH ratings, then you will need to keep downloading and importing the daily file to update in Proform.

We also suggest that the next day you also download the previous days file and import again if you have not updated throughout the day so that you keep on top of importing historical data. You could of course just do this every few days or at the end of a month if required.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Understanding the data

On the JSH website there is a user guide which can be found [HERE](#).

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

JSH Prices in the Form Book

Live and historical JSH prices can be seen on the race card screen, horse form, prior form and post form screens in Proform, here is a screen shot of live race card prices and a horses form with historical prices.

The screenshot displays the Proform interface for a race on Monday 14 Nov 2022. The top section shows the race card for 'Plumpton (LH - Sharp / Undulating) (Monday 14 Nov 2022)'. Below this is a table of live race card prices for various horses, with color-coded JSH values indicating percentage movements. The bottom section shows the form book for the Northern Point (341817) horse, also with color-coded JSH values.

We have use the same colour coding JSH use on their live prices screen for percentage movments, which are

- Price movement greater than 5.00
- Price movement between 2.50 and 5.00
- Price movement between 0.01 and 2.49
- No price movement
- Price movement between -0.01 and -2.49
- Price movement less than -2.49

NOTE: JSH show the percentage divided by 10
 Example if they show 5.68 then this is 56.80% steam in price or -0.45 would be -4.5% drift.
 A positive percentage is a steam in price and negative is a drift in price.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

JSH Prices in the System Builder

There is a new tab in the system builder called JSH – Ratings & Prices.

The screenshot shows the 'JSH Prices' tab in the system builder. The interface is divided into two main sections: 'JSH Fields by Rank' and 'JSH Fields by Value'. Each section contains a list of fields with corresponding input boxes for querying. The fields include various ratings and move percentages. A note at the bottom right states: 'NOTE: JSH show percentages divided by 10 Example 20% would be 2.0'.

JSH Fields by Rank	JSH Fields by Value
CPR Ratings:	CPR Ratings:
Star Ratings:	Star Ratings:
Newspaper Tips Ratings:	Newspaper Tips Ratings:
Newspaper Naps Ratings:	Newspaper Naps Ratings:
9am to 11am Move Perc	9am to 11am Move Perc
11am to 60min Move Perc	11am to 60min Move Perc
11am to 30min Move Perc	11am to 30min Move Perc
11am to 15min Move Perc	11am to 15min Move Perc
11am to 5min Move Perc	11am to 5min Move Perc
11am to 3min Move Perc	11am to 3min Move Perc
11am to 2min Move Perc	11am to 2min Move Perc
11am to 1min Move Perc	11am to 1min Move Perc
3min to 1min Move Perc (321)	3min to 1min Move Perc (321)
Mean Move Perc	Mean Move Perc

NOTE: JSH show percentages divided by 10
Example 20% would be 2.0

In this tab you can query

- The ranks of the JSH Ratings
- The ranks of the percentage movements
- The values of the percentage movements

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Check the JSH Tick Box to run System Builder Queries

There is a JSH tick box in the system builder on the heading area

If you want to output the P/L to the various JSH price points, then you need to check this box first.

If you use any field on the JSH Tab in System Builder, then the box will get auto checked when you run a System Query.

Here is the output to a query with the JSH tick box checked which will be at the end of the system builder returns area

	9am PL	10am PL	11am PL	60m PL	30m PL	15m PL	5m PL	3m PL	2m PL	1m PL

30	4.39	5.47	5.20	8.04	3.42	4.10	4.48	4.63	4.57	2.58

NOTE: The JSH prices are not adjusted for Non-Runners. This means the P/L at any given price point in a race that subsequently has a non-runner or withdrawal would have been the price before any exchange % reduction. Bear this in mind when looking at the P/L for systems.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

JSH in System Builder Preferences

You can add in lost of JSH fields for drill down or exporting using the system builder preferences screen. They are at the bottom of the page currently but will move up as new drill fields get added in future releases.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Form Book Filters

GA has been added to the form book main filters screen on the race related filters tab.

This means you can create any number of filters to quickly filter form in the form book using GA's.

To refresh yourself on how filters work visit this [help link](#).

We have also changed the distance filters to yards on the same screen. This is because the old method contains a bug when new distances were introduced which meant filters kept breaking.

By using yards instead this fixes that issue.

NOTE: Any existing filters you have setup will need to be opened and re-saved for them to work.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Today's Runners Screen

Added new fields for classnum, date and time split out, distance in yards and jockey claim to both quick and slow today's runners screen.

Auto Non-Runners

If non-runner tool is running in auto mode, then it will check that it is on today's date before processing the non-runners.

This will mean that if Proform is left running 24/7 then the first check after midnight will roll the auto non-runner tools date forward to the new day.

Welcome Screen

Made horse watcher on welcome screen sizeable and added a new field so you can order by day, course, time, and you can now right click to see notes.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Decs date Queries

Changed dec date query to not take an extra day off before calculating backwards because 14 days back was 15 days back and should not have been

Horse Perf Screen

Added trainer 5, 10, 15, 20, 25, 30 day, 1, 2, 3, 4, 5-year and comparisons of days to 2 years PRB and PRB^2 to horse perf screen.

Added second horse name, horse_1.

Exporter

Lots of fields added to exporter for the JSH prices and PRB fields.

NOTE: There are still more to add regarding PRB and many other fields still to add in future releases.

Proform v1.92 build.4 Release Notes (includes build 2 and 3)

Calendar Screen

Added winner, winners speed rating, official going, GA and actual going to calendar screen.
